WORK EXPERIENCE

Junior Software Engineer

AnySolution S.L - February 2024 - June 2024

I worked as a Full Stack developer, carrying out various projects from the initial concept to its concrete realization. I did tasks like creating end-to-end solutions using new web technologies and advising team members, including daily code reviews and help with company systems.

- Creation of technical solutions to complex problems
- Testing and correction of errors in the system
- Application and software development
- Integration of innovative and updated technologies

Web Developer Full Stack Junior

Codenotch - November 2023 - January 2024

I worked as a Full Stack developer on a complete project, participating from conception to final implementation. I focused primarily on front-end development and application design, ensuring an intuitive and optimized interface. In addition, I collaborated in the structure and management of the database, contributing to the stability and efficiency of the system.

- Design and implementation of solutions for complex technical challenges
- Identification, testing and error resolution to improve system stability
- Development of intuitive and optimized interfaces for a better user experience
- Application and integration of modern technologies to optimize the performance and scalability of the project
